Description

Deer Valley Growth Fund has become a staple in the industry for easy keeping attractive females that work in any environment. 7454 is cut from the same mold; she is a structurally sound well balanced female that offers an extra shot of dimension on the hoof. Go to paper and you will see that she reads above breed average in virtually all production EPDs. I am confident that this fescue adapted heifer has the propensity to make lasting improvements within any producer's herd.
