We have some at the Farm for pick up in Ohio please call with any questions.

Description

I spent a fair amount of money buying Gronc semen to make this mating, but man I think this could be the next big thing for Purebred Maine-Anjou cattle. I really think this could make them as good and sell as high as anything you can buy anywhere. if you don't know about the 85D cow, The destiny daughters have worked well for several breeders. Most known is the one who works at the Goettemoeller program. She is the mother of Drivin 80 and the mother of Egbert's Grand steer at Ohio State fair a few years back. 85D is the one that combines a freak neck with body and dumb hair. We think after our success we have with our Valentine cow making Maine cattle. 85D will take it to the next level.
